

Power Guardian

PG-1016

Power Protector with Adjustable Timer

- **30 AMP Fuse**
Easy access ATC inline fuse
- **Reverse Polarity Protection**
To protect equipment, it will not supply power if input polarity is inverted
- **Under-Voltage Protection**
To protect car battery, it will not supply power if input voltage drops below 10 VDC
- **Over-voltage Protection**
To protect equipment, it will not supply power if input voltage exceeds 16.5VDC
- **Restore Delay for Over-Voltage**
Once an over-voltage spike is detected, it will wait 6 seconds before restoring power
- **Adjustable Timer**
Easy to adjust 4 positions switch controls
output time in 30 minute increments
- **Ignition Sensing**
It starts timing cycle every time the ignition switch is turned off
- **Made in the USA**
